Differentiation

Technical competency alone does not enable the optimal value contribution. To provide the leadership and ROI levels customers deserve, AppCurity personnel maintain not just the technical expertise for the required solution, but the relevant business acumen as well (e.g. business processes, organizational / departmental functions, business models, regulations, etc).

This dual competency is consistently identified by our partners, resellers and customers as AppCurity's differentiator. Our team is one of the industry's most experienced as evidenced by the 194 years of industry-specific experience and over 160 professional certifications.

The Law

GLBA, SOX, HIPAA, NERC, ISO, FISMA, PCI and more are all regulatory mandates aimed at insuring the protection of customer data and information throughout numerous industries. Each Industry has Regulatory Agencies charged with enforcing and reviewing these businesses.
